EasyFlow

Still using
paperwork for approvals?
There's a better way

Digitize. Integrate. Automate

Powered By

kissflow

? Is This Your Reality?

- 1 Are approvals still manual and paperwork-based?
- 2 Do delays impact efficiency and decision-making?
- 3 Are you struggling with tracking, archiving, and reporting?
- 4 Do you require data integration from external systems (ERP, databases, etc.)?

 If you answered YES to any of the above, We have a fix.

So What's EasyFlow?

EasyFlow (powered by Kissflow) is a cloud-based solution that helps businesses digitize, automate and streamline their workflows. It replaces manual, paper-based processes with efficient digital systems, improving accuracy, speeding up approvals, enhancing tracking and supporting better decision-making across the organization.

Key Benefits

Standardized process flows for uniformity

Secure cloud-based access (Web & Mobile - Android/iOS)

Data accuracy with built-in controls and approvals

Digital dashboards and archives for tracking & reporting

Simplify complex processes, saving time & costs

Achieve compliance & audit-ready workflows

Seamless system integration & audit-ready workflows

Dedicated expert support for implementation

What Can You Automate with EasyFlow?

HR Workflows - Examples include Employee onboarding and Leave approvals

Finance Workflows - Examples include Expense claims and Credit Control Processes

IT Workflows - Examples include Asset Management and Change request processes

Service Desk Workflows - Examples include Support ticket and Case management processes

EHS Workflows - Examples include Safety checklists and emergency processes

Legal Workflows - Examples include contract management and Compliance processes

Operations workflows - Examples include Travel requests and manpower requisitions.

Warehouse and Logistics workflows - Examples include Material planning and material tracking processes

Why Teams Love EasyFlow

Speed up approvals and reduce delays

Standardize forms with built-in logic
